THERN DAVIT CRANES GIVE YOUR PROJECT A LIFT

VERSATILE

Although Thern davit cranes are commonly mounted on concrete or other stable structures, they can also be mounted to vehicles for even more portability. Depending upon the vehicle or intended use, our davits can be flush mounted, pedestal base mounted or even mounted using our wall mount base.

PORTABLE

Besides being mounted on a vehicle, Thern's portable davit cranes are quickly disassembled and can easily be moved to other locations wherever there is a need to lift and position virtually anything weighing up to 2,000 lbs.

AFFORDABLE

Because of their portability, Thern davit cranes are very affordable. With the purchase and installation of one crane and multiple bases, a Thern davit crane is the right choice.

DURABLE

Thern davit cranes come in several different finishes to withstand any environment. Our davits come standard with a durable red powder coat finish, but are also available Galvanized, 304 and 316 Stainless Steel as well as Epoxy coated. Custom colors are also available.

WINCH ONE IS FOR YOU?

Depending upon the load weight and dimensions, hook height needed above or below floor level, hook reach required, long or short load lifts, spur gear or worm gear hand or power operated winches, AC/DC or drill drivable options – our experts will help you choose the perfect davit and winch combination to handle your project with ease. Let us help make your job faster, safer and easier with the use of the best davit crane available - Made in the USA.
