UV Panel lifting

THERN WINCHES & DAVIT CRANES GIVE YOUR FACILITY A LIFT

VERSATILE

Thern winches and davit cranes are commonly found at water and wastewater treatment facilities performing a multitude of tasks at lift stations, in pump houses, collection sewers, bar screening, aeration tanks, clarifiers, filtration, ultraviolet disinfection, biosolid recycling, maintenance shops and more.

PORTABLE

Thern's portable davit cranes are quickly disassembled and can easily be moved by one person to other locations wherever there is a need to lift and position virtually anything weighing up to 2,000 lbs. While our stationary cranes can lift up to 3,000 lbs and our winches can lift, pull or position virtually anything weighing up to 100,000 lbs and beyond.

AFFORDABLE

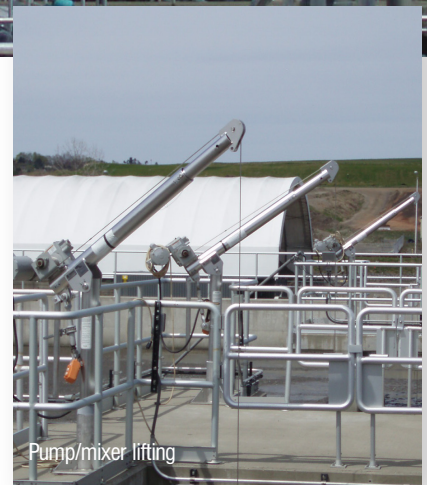

Thern portable davit cranes offer an affordable alternative to other methods or products such as a permanently mounted jib crane. Specifically designed to perform the task at hand, our cranes are also much safer than dangerous, make-shift solutions. With the purchase and installation of one crane and multiple bases, a Thern davit crane is the right choice.

DURABLE

Thern davit cranes come in several different finishes to withstand any environment. Our davits come standard with a durable red powder coat finish, but are also available Galvanized, 304 and 316 Stainless Steel as well as Epoxy coated. Custom colors are also available.

WINCH ONE IS FOR YOU?

Depending upon the load weight and dimensions, hook height needed above or below floor level, hook reach required, long or short load lifts, spur gear or worm gear hand or power operated winches, AC/DC or drill drivable options – our experts will help you choose the perfect davit and winch combination to handle your project with ease. Let us help make your job faster, safer and easier with the use of the best davit crane available - Made in the USA.
